Beverage Seam Saw

#97452 Double Seam Saw for Beverage Cans

The safe, fully enclosed double seam saw for beverage cans traps seam shavings and sound inside, protecting users by dramatically reducing noise levels and keeping fingers safe.

The Seam Saw is engineered to safely cut Beverage Can Double Seams precisely and efficiently, giving you a clear image for highly reliable Double Seam Inspection.

The Beverage Seam Saw uses two parallel blades, one mounted to cut along the diameter of the can, to make the cross-section without chattering, distorting or changing hook lengths. This provides an accurate radial slot, free from distortion, and with minimal burr, for use in Double Seam imaging and measurement.

Product Highlights:

- Simple and ergonomic design provides safe operation
- Quiet - Totally enclosed unit cuts noise level; keeping it below 85dB
- Saves time - Easily accessible blade compartment makes for quick blade changes and maintenance, while containing noise and can shavings
- Holds the can securely in place to ensure high quality cuts
- Metal sensor keeps hands safe – saw will only function when metal is detected
- Accommodates diameters from 202 – 300, adapters may be changed in seconds

Adapter for 211 Can

Technical Information:

End Size Range: 200-209
Body Size Range: 200-300
Electrical Power Rating: 120/240 VAC,
50-60Hz
Weight: 38 lbs/ 16kg

Saw Blades: 80 x 22 x 0.5mm, HSS
Speed: 3000 rpm
Dimensions: 18"W x 10"D x 9"H
450W x 250D x 225H mm

Ordering Information:

97452-00 Saw for 120V
97452-50 Saw for 240V
97452-15 HSS Saw Blades, 80 x 100 x 0.5mm
97452-05 Adapter for 211 Body Cans
97452-06 Adapter for 204 Body Cans(Sleek)
97452-07 Adapter for 202 Body Cans(Slim)
